Advanced Care for Animal Health **Veterinary EXCELLENCE**

Serving the Middle East with Marine & Industrial Excellence

A&G Bio Pharma Solutions PLC is a woman-owned enterprise committed to transforming Ethiopia's veterinary and medical sectors. We focus on the import and distribution of high-quality veterinary pharmaceuticals, medical equipment and devices, and nutritional feed supplements.

Your Partner in Veterinary & Medical **EXCELLENCE**

At A&G Bio Pharma Solutions PLC , we are driven by a deep commitment to improving veterinary and human health across Ethiopia. As a woman-owned enterprise, we bring a unique perspective and dedication to quality, integrity, and innovation. Our products—from veterinary pharmaceuticals to medical equipment and nutritional feed supplements—are carefully sourced and rigorously tested to meet global standards, ensuring safety, effectiveness, and reliability for every client we serve.

With a clear focus on community health, sustainability, and long-term impact, A&G is more than a supplier—we are a trusted partner in building a healthier and more resilient Ethiopia

OUR PRINCIPLES

PROFESSIONALS TEAM

Our strength lies in our expert team of professionals who bring deep industry knowledge, technical expertise, and a shared commitment to advancing healthcare.

GLOBAL FOOTPRINT

With a strong and growing global network, we source and distribute top-tier pharmaceutical and medical products from trusted international manufacturers.

HEALTH PHARMACEUTICALS

We provide a wide range of high-quality veterinary pharmaceuticals designed to support animal health and well-being across all sectors. Our carefully selected products meet international safety standards

LEADING EDGE INNOVATION

Innovation drives everything we do at A&G. From sourcing the latest medical technologies to introducing modern solutions in livestock health and nutrition, we are committed to staying ahead of industry trends.

SERVICES OFFERED

Our goal is to support healthier animals, stronger farms, and more efficient. Healthcare systems through reliable, science-backed solutions.

SOLUTIONS

POULTRY FARM CONSULTATION

At A&G Biopharmaceutical Solutions PLC, our Poultry Farm Consultation services are designed to support farmers in optimizing their operations for better productivity, health, and profitability. Our team of experts offers guidance on every aspect of poultry farming, including biosecurity measures, housing design, disease prevention, vaccination programs, nutritional planning, and flock management.

We understand that each farm has unique challenges, and we tailor our consultation to address specific needs, whether you're starting a new operation or looking to improve an existing one. With our deep industry knowledge and access to high-quality veterinary pharmaceuticals and feed supplements, we help poultry farmers implement best practices that lead to healthier birds and higher yields.

Our goal is to equip clients with the right tools, products, and expertise to make informed decisions, reduce mortality rates, and ensure sustainable growth. From small backyard farms to large commercial operations, A&G is your trusted partner in building a successful and resilient poultry business.

DAIRY FARM CONSULTATION

At A&G Biopharmaceutical Solutions PLC, our Dairy Farm Consultation services are designed to help farmers maximize milk production, improve herd health, and increase overall farm efficiency.

Our experienced consultants provide expert advice on animal nutrition, reproductive management, disease prevention, vaccination programs, housing systems, and milking hygiene. Whether you're setting up a new dairy farm or optimizing an existing one, we deliver tailored solutions that align with your goals and local conditions.

We go beyond general recommendations by integrating high-quality veterinary pharmaceuticals and nutritional feed supplements into your farm plan, ensuring healthier cows and better yields. Our approach focuses on sustainable practices that boost productivity while maintaining animal welfare and environmental responsibility. With A&G as your trusted partner, you gain access to reliable expertise, premium products, and ongoing support to build a successful, modern dairy operation.

FATTENING FARM CONSULTATION

At A&G Biopharmaceutical Solutions PLC, our Fattening Farm Consultation services are tailored to help livestock farmers achieve optimal weight gain, improved feed efficiency, and healthier animals in a shorter production cycle. Our team of experts provides guidance on feed formulation, animal selection, health management, vaccination protocols, and housing conditions.

We work closely with clients to design fattening programs that are cost-effective, nutritionally balanced, and aligned with market demands. By integrating our high-quality veterinary pharmaceuticals and nutritional feed supplements, we ensure your livestock reach ideal market weight while minimizing health risks and mortality rates. Our science-based approach helps maximize profitability and sustainability, whether you're managing a small-scale operation or a large commercial farm. With A&G, you gain a knowledgeable partner committed to your success in the competitive livestock industry.

Rooted in Ethiopia. Trusted Worldwide.

BETTER PRODUCTS, STRONGER COMMUNITIES

A&G Bio Pharma Solutions PLC a woman-owned enterprise committed to transforming Ethiopia's veterinary and medical sectors. We focus on the import and distribution of high-quality veterinary pharmaceuticals, medical equipment and devices, and nutritional feed supplements.

With a strong ethical foundation and a drive for innovation, we aim not only to supply critical products but also to catalyze change in the veterinary and livestock health industry—enabling communities to go beyond current limits and shape a healthier, more prosperous future.

Leadership Rooted in Impact

Veterinary MEDICINE

President **MESSAGE**

At A&G Bio Pharma Solutions PLC , our mission is rooted not only in medicine—but in dignity, equality, and empowerment.

As a woman leading in the fields of veterinary health and agricultural innovation, I carry the voices of millions of rural women who walk miles under the sun—guiding cattle, tending farms, raising children, and holding entire communities together. These women are not just farmers. They are providers, protectors, and pillars of resilience. But too often, they are left out—excluded from decision-making, under-served by veterinary systems, and under-valued in the economy.

We go beyond pharmaceuticals. We create access to health, knowledge, and opportunity. We support women pastoralists and smallholder families through veterinary training, community programs, and sustainable partnerships that uplift, not exploit. Through public-private partnerships, we align with local governments, NGOs, and global manufacturers to build inclusive systems that reach the most remote and deserving communities. We invest in women-led solutions, in next-generation leadership, and in a fairer agricultural future.

Ms. Endegen Abebe

(President,A&G Bio Pharma Solutions PLC)
